

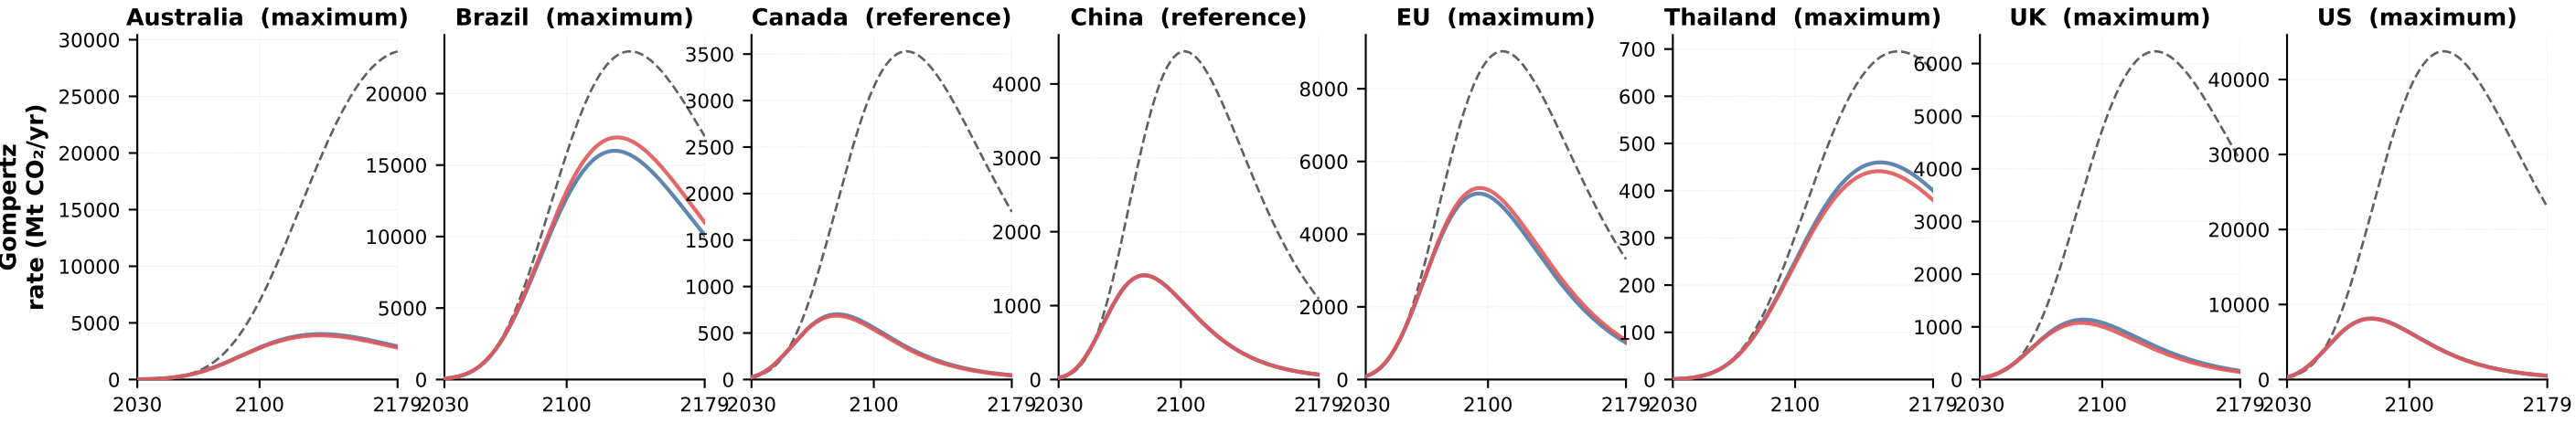

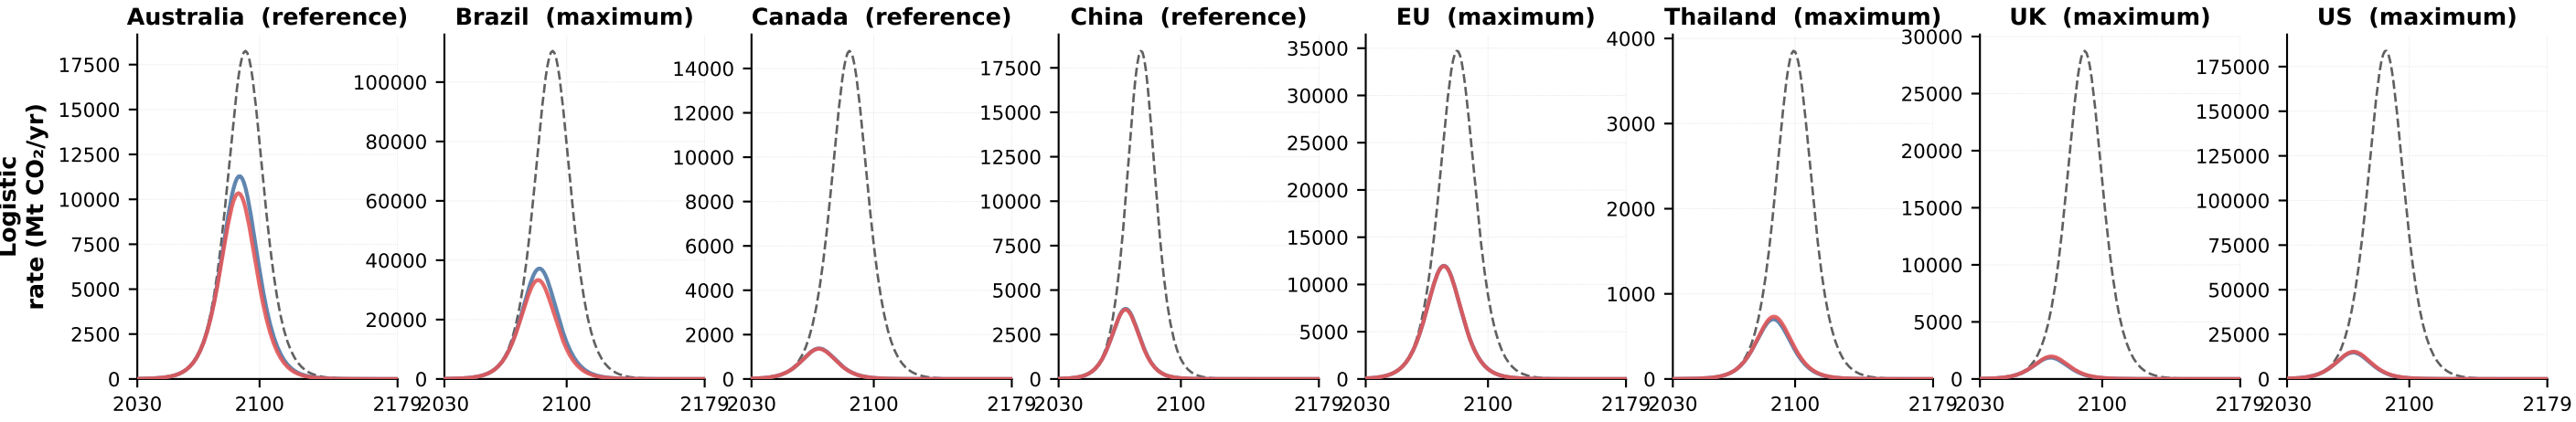

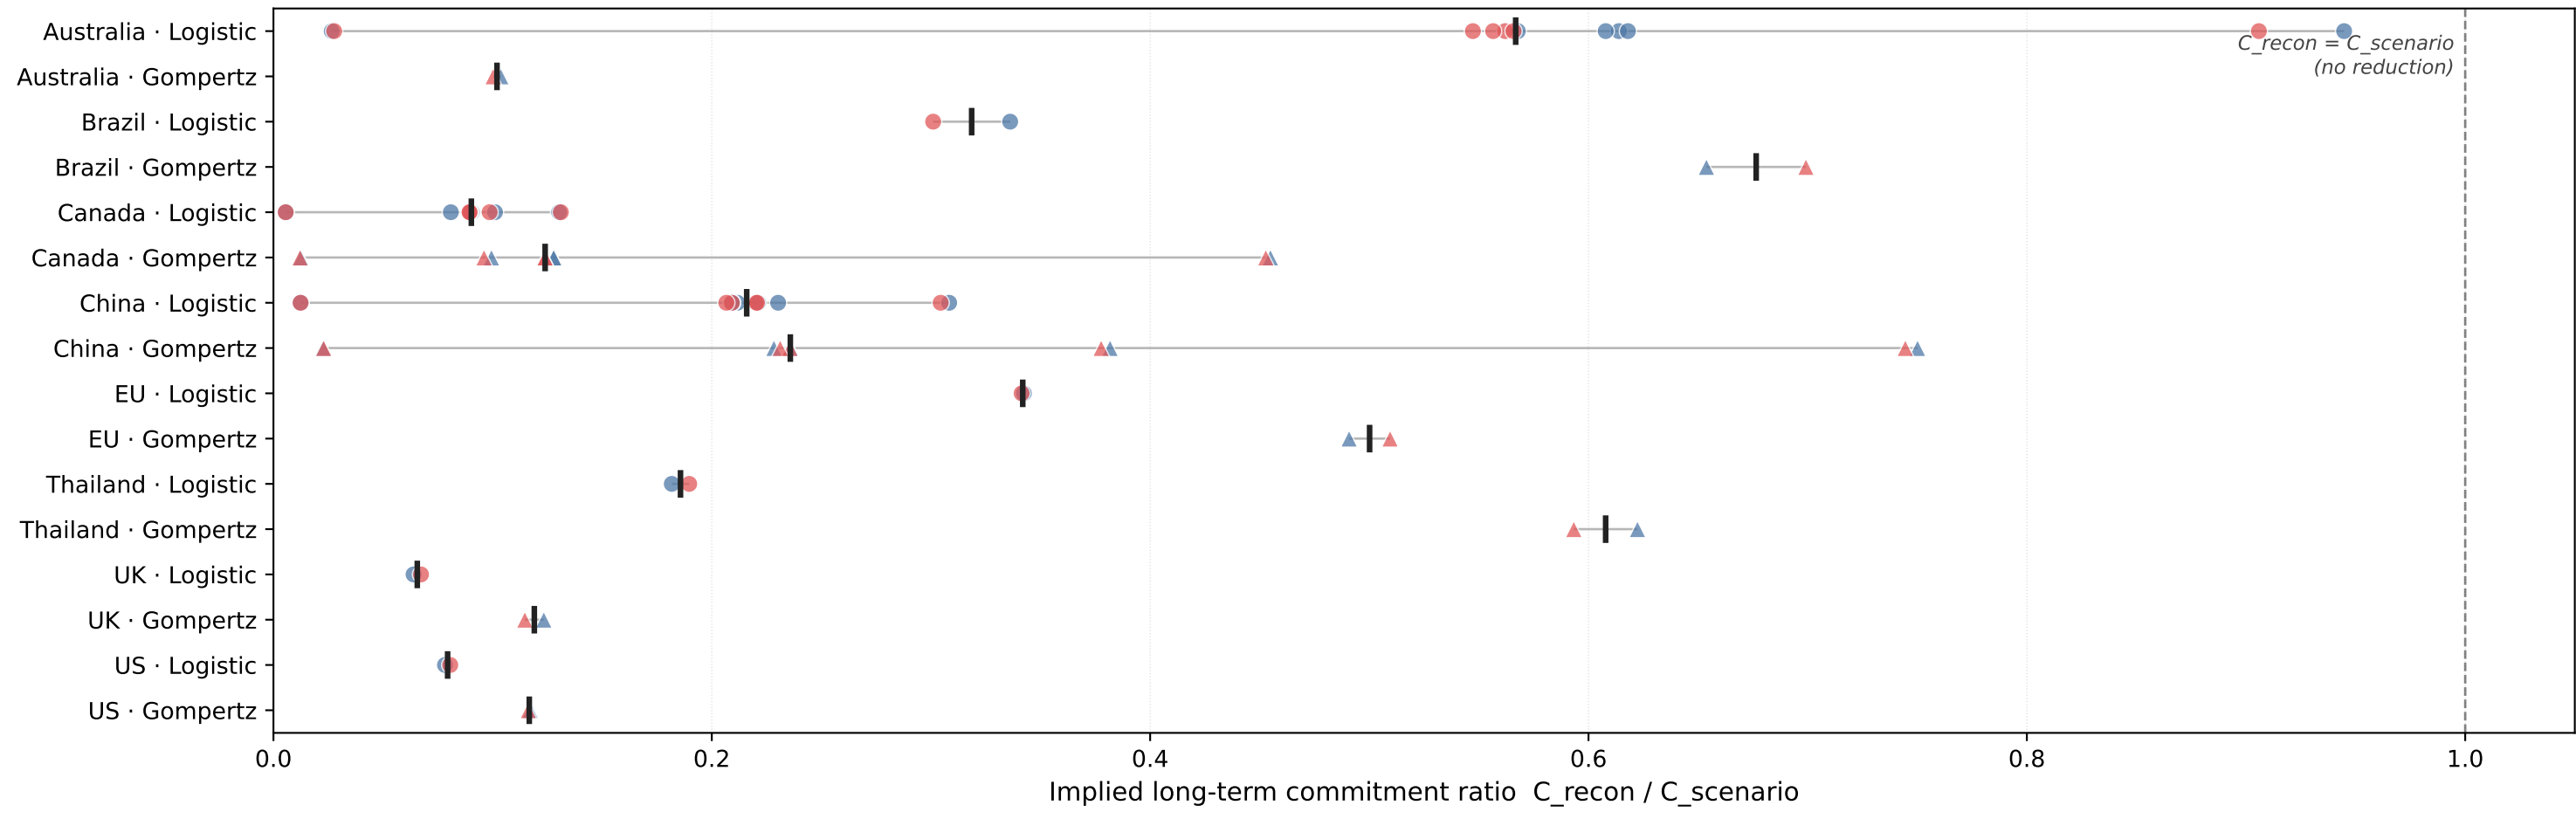

Figure P3-3 — Country-level feasibility summary

Smooth-reconstructed long-term commitment $C_{recon}/C_{scenario}$ across 78 failed order-cases · median = 0.21 · sparklines show one representative scenario per (country, model): reference if failed, else worst-clipped.

(a) Feasibility cost per country × model — strip = scenarios, long tick = median, whiskers = min/max

■ ascending ■ descending ● Logistic ▲ Gompertz --- original (Part-1) — feasible · ascending — feasible · descending
